Table of contents

Part I: Papers

Topic: Solid waste management in rural and urban areas

A cost-benefit analysis of unit-pricing on household garbage in Taipei. Lihchyi Wen…………A1
A technological progress on kitchen waste disposal of disinfection and desaltification. Dewen He…………………………………………………………………………………………………A9
An effect of food waste content on energy characteristics of carbonization residue from the mixture of organic wastes. Seung-Whee. Rhee…………………………………………………A13
An effective way to solve garbage siege. Ju-ming Li…………………………………………A18
Application of fourier transform infrared spectroscopy for assessment of degradation and stabilization of land-filled municipal solid waste. Hua-yong Wu………………………………A21
Comparison of aerobic and anaerobic degradation of municipal solid waste. Rui Li…………A25
Discussion on the way to resolve disputes on construction of waste-to-energy plants in China. Xiaolei Lv………………………………………………………………………………………A30
Environmental impact comparison of different levels of municipal solid waste systems in Beijing with a life cycle assessment model – EASEWASTE. Zhao Yan………………………………A42
Fundamental study on anaerobic degradation law of municipal solid waste in the landfill plant from Beijing, China. Li-mei Ren………………………………………………………………A47
Hydrothermal carbonization of typical components of kitchen garbage. Qianfang Wu…………A50
Integrated waste treatment: a solution to the problem of municipal solid waste. Qinglong Xie……………………………………………………………………………………A55
Optimizing vermicomposting of country organic waste. Ping Yang……………………………A61
Preparation and performance of polyurethane film by industrial solid wastes - alkali lignin. Xiaoli Zhang……………………………………………………………………………………A66
Problems and challenges of municipal solid waste incineration in China. Lin Wei…………A70
Research on leachate refluence and its application in municipal solid waste. Huilan Hong……A76
Rheological investigation of rice straw modified by benzyl chloride. Linshan Wang…………A81
Solid waste management in the Arab Region. Farag .A.EL Mabrouk…………………………A85
Status analysis and new thinking of sludge treatment and disposal in municipal wastewater
treatment plant. Qingbin Lu…………………………………………………………………….A91
Study of MSWI fly ash aggregates by sintering. Juchieh Lee……………………………………A95
Study of the model forecast of Beijing municipal solid waste output. Ying Li………………A100
Study on utilization technology of waste plastics from municipal solid waste. Dewen He…A109
Synthesis and oil absorption of chemically modified wood waste materials. Yuan Gao………A113
The construction of Venous Industrial Park and the development of urban low-carbon. Shaonan
Qiu……………………………………………………………………………………………A117
The process of preparing activated carbon from waste banana stem by vacuum activation with
phosphoric acid. Shaohong Peng………………………………………………………………A122
Urban solid waste management based on geoinformatics technology. Elmira Shamshiry……A126

**Topic: E-waste management and technology**

A non-polluting method for separating and recycling metals from crushed electronic wastes by
vacuum metal-lurgy. Lu Zhan…………………………………………………………………A131
Ag recycle from waste PDP glass. Mengjun Chen……………………………………………A137
Analysis of dust pollutants emitted from scrap printed circuit board crushing process. Shufang
Ding……………………………………………………………………………………………A141
Chemical recovering of epoxy resin and glass fibers from waste printed circuit boards. Chuanjin
Guan……………………………………………………………………………………………A144
Effect of replacement of household electrical appliance program on Chinese WEEE recycling
industry. Xiangyang Xu………………………………………………………………………A148
Mechanical properties of crushed nonmetallic particles of waste printed circuit boards reinforced
resin composites. Zongke Zhang……………………………………………………………A153
Orthogonal experiments of enriching valuable metals from waste printed circuits boards by
hydraulic shaker. Jie Liu………………………………………………………………………A157
Recovery of materials from waste tin-plated wire and cable by vacuum pyrolysis-centrifugation
coupling technology. Yihui Zhou……………………………………………………………A161
Research on technological parameters of pulverization and separation of waste printed circuit
board by private mechanical milling. Mingxing Zhang……………………………………A165
Roasting, phase transformation and leaching of valuable metals in spent lithium. Dunfang
Li………………………………………………………………………………………………A170
Separation of copper foils and base plates from waste printed circuit boards by chemical swelling method. Hongbin Cao

Study of Sb2O3 effects on the properties of foam glass from Waste CRT Panel Glass Recycling. Huihui Lian

Study on crushing mechanical properties of spent lithium-ion batteries. Tao Zhang

Study on management strategies of E-waste in China based on the theory of circular economy. Wuming Xie

Study on pyrolysis characteristics and kinetics on printed wire boards and copper-clad laminate. Qina Sun

Study on the thermal degradation kinetics of waste computer housings. Jixing Xie

Study on Three Estimation Methods for discarded household Appliances in China. Hui Tian

Supercritical solvents treatment of waste plastic from WEEE. Yanmin Wang

Technical workflow aelection for WEEE eecycling facilities in China. Li Yan

The debromination and thermal degradation of flame retardant acrylonitrile-butadiene-styrene copolymer. Weiyi Du

The preparation of activated copper oxide from Low-grade copper containing waste PCB. Qi Wang

The recycling technologies for spent lithium-ion battery. Erbo Zhou

The research of innovation management of electronic waste in China which is based on the principle of 3R. Huansen Mu

WEEE management: Its achievements and further agenda in Japan and the EU. Yoshida Fumikazu

Which model of extend producer responsibility is best for WEEE recycling in chinese societies? An empirical study in taiwan and China. Chun-hsu Lin

**Topic: Hazardous waste management**

A multimedia fugacity model of the fate of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans in China. Jianxin Zhu

A study on the mechanism of preventing and combating illegal waste shipments between China and EU. Yang Zheng
Accelerated solvent extraction of chlorobenzenes and polychlorinated biphenyls from municipal fly ash. Keqing Yin

An analysis of factors influencing supercritical water oxidation waste disposal. Yiming Wu

An introduction of the ssing of PFOS In China fire industry. Zhanghui Yan

Analysis of PCBs in five kinds of fly ash using microwave-assisted extraction. Yifei Sun

Analysis of physical-chemical characteristics for electrolytic manganese residues. Bing Du

Application of life cycle assessment on technology selection for POPs contaminated sites management and remediation. Xintao Hu

Catalytic effect of fly ash on potential formation and destruction for PBDD/Fs in the air pollution control devices. Chieh Lin

Characterization and comprehensive utilization analysis of exploited MSW based on landfill sustainability. Jinwen Liu

Chlorine migration in the calcination process of washed fly ash from municipal solid waste incinerator. Fenfen Zhu

Environmental safety of clinker after c-processing of Zn contained waste. Lei Wang

Experiences of asbestos emission control and waste management in Japan. Atsushi Terazono

Experimental study on the dehydration means of oily sludge. Leilei Mi

Exploring an innovative technology for the dismantling and preprocessing of printed circuit boards. Yao Chen

GC/MS analysis of PAHs in the atmosphere surrounding refuse incineration plant from Beijing, China. Yang Li

Management status and countermeasures of hazardous waste in China. Honglin Teng

Mechanochemical sulfidation of heavy-metal containing waste residue for stabilization. Xiaobo Min

Modeling of Zn migration during the co-processing of MSWI fly ash with cement kiln. Lei Wang

Preparation of cementing materials using the lime neutralization sludge. Yong Ke
Preparation process of ultrafine copper powders from electroplating sludg. Feng Kong…A344
Research on the control-management system of destruction for high-risk hazardous chemicals waste based on factors. Hongyuan Zhang…………………………………………………………………………………A348
Review of oily sludge disposal technologies and treatment countermeasures for zhoushan area. Xiaojiang Shen…………………………………………………………………………………………………………A353
Sequential treatment methodology for hazardous solid waste from organic arsenic industry. Lifang Hu…………………………………………………………………………………………………………A357
Stabilization of chromium by humus in aerobic composting of food wastes and chromium-contaminated soil. Chunji Jin…………………………………………………………………………A362
Stabilization process analysis of landfill units based on the carbon life cycle and the sustainable landfill model. Jinwen Liu……………………………………………………………………………A367
Statistical assessment of contaminated soil remediation technology in China. Guolong Gao…………………………………………………………………………………………………………A373
Status and tendency of hw landfill technology in China. Yuqiang Liu…………………………………………………………………………………………………………………………………………………A377
Strategy research on laboratory hazardous. Juan Men………………………………………………………………………………………………………………………………………………………………………A382
Suggestions on improving charging policy for medical waste centralized disposal. Ning Sun…………………………………………………………………………………………………………………………A385
The continuous titrimetric analysis and determination of copper, lead and tin in waste PCB. Qi Wang…………………………………………………………………………………………………………………A390
The dioxin control technology of cremation and management in China. Chenglong Xiao…………………………………………………………………………………………………………………A394
The treatment technique of refining arsenic sediment by using magnetic separation-shaker re-selection and the environment impact of the contamination. Wei Chen…………………………………………………………………………………………………………………A398
Thermodynamic analysis of alkaline leaching of solid wastes bearing zinc. Chenglong Zhang…………………………………………………………………………………………………………………A402

Part II: Papers

Topic: Municipal sewage management

A study of CO2 reduction potential by using waste sludge about applying the power plants. Sangwon Park………………………………………………………………………………………B1
Excess sludge disintegration by combined effects of ultrasonic and mechanical treatment. Tong
Zhu Feasibility of municipal sludge application for remedy of desertified soil. Xia Li

Impacts of flocculation conditioning on dewaterability and physicochemical properties of anaerobic digested sludge(ADS) flocs. Jing Feng

Influence of initial physic-chemical properties on bio-physical drying of dewatered sewage sludge. Rong Han

Leaching behavior of heavy metals from phosphatized sludge and bottom ash. Ping Tang

Research of sludge security landfill technology and engineering based on geotechnical filter bag. Jiao Xu

Research on resource utilization of city sludge. Xiaomei Wang

Sewage sludge conditioning and dewatering by bioleaching. Lingpeng Xiao

Sewage sludge treatment by under-water plasma. Yongjun Liu

Sludge reduction technology for municipal wastewater treatment. Tienchin Chang

Study on production of sintered ceramisite by coal gangue and municipal sewage sludge. Guijie ZHANG

Technology research of sludge co-processing in cement kiln. Yusheng Jiang

The effect of high speed mixing and polymer dosing rates on the geometric and rheological characteristics of conditioned anaerobic digested sludge (ADS). Yili Wang

The effects of pore structure and surface functional groups of sludge activated carbon on the adsorption of organic pollutants. Daojing Li

The municipal sludge drying and the exhaust waste heat recovery technology. Chunrui Ren

The policy study of municipal garbage treatment in China. Dayou Tang

The situation and policy recommendations of China's urban sewage sludge treatment and disposal. Xuefeng Wen

The transformation of phosphorus forms during co-composting of sewage sludge and wheat straw. Cheng Jia

Thermodynamic prediction of Cu speciation transformation and distribution during sludge sewage incineration. Rundong Li

Transportation and transformation of pollution factors in the sludge reduction process of aerobic digestion systems. Kunbai Chen

**Topic: Other issues related with solid waste**

Adsorption of Pb(II) from aqueous solutions by fast-growing ucalyptus leaves. Qiuyan Yao......................................................................................B100

Alkaline hydrothermal pretreatment for the increase in biodegradability of leaves waste. Hao Wang.................................................................B106

Certain environmental legal liability of enterprise—— The initially search of the enterprise environmental protection rating system. Haichen Huang..........................B111

Comparative study on site selection of refuse landfill under different environmental geological conditions. Lixin Pei.................................................................B116

Comparison of methane production from different municipal biomass waste. Wei Qiao…..B123

Cu(ii) removal from electroplating sludge leachate by alkaline ca-bentonite. Hanbing Zhang.................................................................B128

Determination of acid volatile sulfide and simultaneously extracted heavy metals in sediments from Hongfeng Lake. Jiping Zhang.................................................................B132

Effect of waste oil on bioethanol production from food waste. Ming Gao.........................B137

Estimation of organochlorine pesticides (DDT and HCH) in surface sediments from Baihua Lake. Liya Fu.................................................................B141

Evaluation of SBBR with shell carrier for wastewater treatment. Yubo Cui.....................B146

Examination and export control of scrap mixed metal in Japan. Atsushi Terazono.............B150

Experimental analysis on additivity of the biogas production from the digestion processes of starch, protein, cellulose and fat. Ling Zhang.................................................................B155

Forecasting the monthly generation of municipal solid waste in Beijing in 2011. Zou Nan…B159

Influence of components and additives on caloric value and compressive strength of sewage sludge briquette. Liping Wu.................................................................B162

Integrated solid waste management in the greater vancouver regional district: current principles, practices and analysis. Zhiyuan LI.................................................................B167

Landfill leachate treatment by RO with disctube module a case study. Yanping Liu.........B170

Methane mitigation from anaerobic digestion by biological inhibition technology. You cai
Zhao……………………………………………………………………………………………B175
Migration behavior of Cu and Zn in bioreactor landfill. YuYang Long………………B180
Multiple linear regression forecast model of municipal solid waste in Beijing satellite towns. Ying Li………………………………………………………………………………………………B186
Performance of shell as constructed wetland media for wastewater treatment. Chunqiu Ran…B192
Potential capacity of LFG-CDM project implementation in Beijing. Ying Xiong…………B196
Prediction of LFG recovery output in large and middle scale sanitary landfill site. Liting Zheng…………………………………………………………………………………………B200
Preliminary discussion on classification of metal mine tailings. Yongli Hao……………B205
Preparation and performance of the coagulant from oil shale ash. Tong Sun………………B210
Pretreatment technology for ethanol fermentation broth from food waste. Hongzhi Ma …………………………………………………………………………………………… B214
Removal of phosphate from aqueous solution by modified red mud. Yankui Tang…………B220
Research of DRI from Indonesia Bauxite red mud. Jianyang Gao………………………………………………………………………………………………………………………B225
Resistance of plants on sanitary landfill in Beijing. Xin Wen…………………………B229
Resource assessment and potential for power generation from Landfill Gas in China. Yong Yang……………………………………………………………………………………………B234
Rhizosphere soil bacterial community composition and methanotrophic bacteria is influenced by landfill cover soil amelioration. Wei Liu…………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………………
Synthesis and application of bagasse fiber-based flocculating agent. Yinghui Wang ........... B296
The industrial policies analysis of the precious-metals recycling in China. Pin Zhou ............ B300
The preparation of silica white from fly ash and its characterization. Zhitong Yao ............ B304
The preparation of slag cementitious materials and experimental study of its application in cemented paste backfill. Fawen Zhang ................................................................. B309
The Properties and Applications of Molten Salts. Xiangyang Zhao .......................... B314
The stability of arsenic in the sintered bricks manufactured from deserted arsenic-adsorbent. Hongjie Wang ................................................................. B320
The status and opportunities of recycling resources industry. Qiang Liu ....................... B323
The theoretical model for the crystalline swelling of montmorillonite. Jingchao Jia ....... B328
Using ERIC-PCR for monitoring changes in the structure of microbial community in UASB for treating hydrolytic liquid from municipal organic wastes. Guotao Liu .......................... B333

**Part III: Presentations**

Policy and Technical Progress of Biosolids Management in America. Chang Chein-Chi ................................................................. C1
Biological oxidation of methane from refuse landfill using aged refuse. Zhao Youcai .... C8
Policy of Solid Waste Management in China. Du Kexiong ................................. C12
Generation, Disposal and Management of Asbestos Wastes in China. Wang Qi ........ C16
Environmental impact of E-Waste. Yadong Li ............................................... C22
China discarded electronic products processing fund characteristics. Xu Jiangping .... C31
Status and Tendency of HW Landfill Technology in China. Liu Yuqiang ............... C33
Heavy metals immobilization technology of fly ash of Kurita. Li Tian ................... C40
Catalytic Effect of Fly Ash on Potential Formation and Destruction for PBDD/Fs in the Air Pollution Control Devices. Pingtung ............................................................. C44
Sewage sludge conditioning and dewatering by bioleaching. Pan-yue Zhang .......... C47
Solid Waste Management in the Arab Region. Benghazi – Libya .......................... C51
Study of MSWI Fly Ash Aggregates by Sintering. Lee ju-chieh ............................. C54
The Situation and Development of restaurant garbage Treatment in China. Ren Lian Hai... C57
The effect of high speed mixing and polymer dosing rates on the geometric and rheological
characteristics of conditioned anaerobic digested sludge (ADS). Yi-Li WANG, Steven-K DENTEL. C62

Magnetic Separation – Shaker re-election, dealing with arsenic residue and environmental impact of new technology. Chen Wei. C68

Influence of components and additives on caloric value and compressive strength of sewage sludge briquette. Liping Wu. C75

Sludge Reduction Technology for Municipal Wastewater Treatment. Tien-Chin Chang. C80

Supercritical solvent treatment of waste plastic from WEEE. Yanmin Wang. C85

Treatment facility construction and operation of hazardous waste. Shunze Wu. C89

Zn Leaching Characteristics of Waste PDP panels. Mengjun Chen. C94

Determination of Acid Volatile Sulfides and Simultaneously Extracted Metals in Sediments from Hongfeng Lake. Jiwei Hu. C97

Operation mode and technology for the treatment and resource recovery of WEEE. C102
