GC.7/Dec.15 MEDIUM-TERM PROGRAMME
FRAMEWORK, 1998-2001

The General Conference:

(a) Recalled its decision GC.6/Dec.10 and Industrial Development Board decisions IDB.17/Dec.2 and IDB.18/Dec.5;

(b) Took note of the medium-term programme framework, 1998-2001, as contained in documents IDB.16/23 and Add.1;

(d) Decided that, in view of decision IDB.17/Dec.2 concerning the Business Plan on the Future Role and Functions of UNIDO and the programme and budgets, 1998-1999, as approved by the General Conference in decision GC.7/Dec.16, the medium-term programme framework, 1998-2001, as mentioned in paragraph (b), was no longer applicable;

GC.7/Dec.16 PROGRAMME AND BUDGETS,
1998-1999

The General Conference:

(a) Approved the programme and budgets for 1998-1999 as contained in document GC.7/21;

(b) Appropriated on the basis of an exchange rate of US\$ 1 = AS 12.90 a total amount of \$145,898,600 for the regular budget of the Organization in 1998-1999, as reflected in the following table:

	(In US dollars)		
	Appropriations	Estimated income	Net requirements
Policy-making Organs	6,680,000		6,680,000
General Management	10,474,000		10,474,000
Strengthening of Industrial Capacities	42,017,500		42,017,500
Cleaner and Sustainable Industrial Development	14,415,000		14,415,000
Regional Programme Management	20,343,700	895,500	19,448,200
Technical Cooperation Management	7,567,600		7,567,600
Administration	44,400,800	13,954,100	30,446,700
Miscellaneous Income		1,508,300	(1,508,300)
Total	145,898,600	16,357,900	129,540,700

Note: The amounts presented in the table are to be adjusted in accordance with the adjustment formula presented at the end of the present decision to take account of exchange rate variations during the biennium.

(c) Decided that the foregoing appropriations of \$145,898,600 at an exchange rate of US\$ 1 = AS 12.90 be financed from:

(i) Payments of contributions by Member States under the provisions of financial regulation 5.5(e) amounting to \$129,540,700 (\$23,355,500 plus the equivalent in United States dollars of AS 1,369,789,086) in accordance with decision GC.7/Dec.11 adopted by the General Conference at its current session concerning the scale of assessments;

(ii) Miscellaneous and other income of \$16,357,900;

(d) Approved estimates of net expenditure totalling \$27,490,200 at an exchange rate of US\$ 1 = AS 12.90

for the purpose of the operational budget for the biennium 1998-1999 to be financed from voluntary contributions and such other income as might be provided for in the financial regulations;

(e) In order to provide a measure of flexibility in implementing the programme of work, allowed the Director-General to submit to the Industrial Development Board for consideration, within the limits of the approved programme and budgets and the financial regulations, proposals that he might judge beneficial for the proper functioning of the Organization;

(f) There was a generally held view in the Conference that, in light of the significant budget reductions already made, any further reductions in the 1998-1999 or future budgets would seriously impair the capacity of UNIDO to fulfil its mandate.

Annex

Conclusions and recommendations of the Fourth Ministerial Symposium on the Industrialization of the Least Developed Countries

Having met in Vienna from 26 to 28 November 1997 in the first part of the Symposium, the Ministers of Industry from least developed countries,

Recalling the recommendations and programmes of action of the first and second United Nations Conferences on Least Developed Countries,

Recalling also the recommendations of the Third LDC Ministerial Symposium included in General Conference resolution GC.6/Res.8,

Noting also the priorities included in the Plan on Action for the Alliance for Africa's Industrialization,

Taking note of the draft resolution on least developed countries (GC.7/CRP.3/Add.1) proposed to the seventh session of the General Conference,

Reiterate their strong support to UNIDO as the specialized agency of the United Nations system devoted to the promotion of the industrialization of the developing countries, in particular the least developed countries, and call for the enhancement of the human and financial resources of the Organization;

While welcoming the special emphasis placed on least developed countries in the Business Plan on the Future Role and Functions of UNIDO adopted by the Industrial Development Board at its seventeenth session in June 1997,¹ express their concern that the development

of industrial human resources and technology transfer have not received required priority consideration in the Business Plan and that activities relating to engineering

and metallurgical industries are to be discontinued, and ask for restoring all these activities;

Express their concern with the sharp reduction of 20.001 per cent in the 1998-1999 programme and budgets, and call for this to be regarded as the last reduction in the UNIDO budget, and for reversing this trend;

Call for the establishment of an effective partnership between UNIDO and the least developed countries in order to elaborate concrete and targeted programmes and projects that can effectively contribute to the industrialization of least developed countries and through which resources can be mobilized from other partners;

Emphasize the necessity for strengthening the field presence of UNIDO, particularly in least developed countries, to bring the services of the Organization closer to the least developed countries;

Express their profound concern about the growing inequalities within the international economic system, the growing gap between least developed countries and other economies, and the increased risk of further marginalization of least developed countries in the process of globalization and liberalization;

Further reiterate the need for elaborating and updating where appropriate the industrial visions and strategic policies of least developed countries so they can respond to the new challenges in the international economic system and for UNIDO to undertake in the next two years a specific programme aimed at assisting least developed countries in these endeavours;

Stress the importance of subregional and regional economic cooperation and integration schemes for the development of least developed countries and the need for UNIDO to undertake measures to provide assistance to least developed countries to strengthen their participation in respective regional trade agreements;

Recognize the significant role played by the informal sector and by micro-enterprises in the industrial development of least developed countries and request UNIDO to promote the development of these enterprises and to assist them in securing partnerships with foreign businesses and enterprises;

Request UNIDO to accord special attention to the least developed countries that have been seriously affected by natural calamities and conflicts;

Take note of the specific industrial development problems raised by the individual least developed country delegations and recommend the following action programme for the biennium 1998-1999 in full partnership with UNIDO:

1. Technological, institutional and financial capacity-building in agro-industrial branches: Under this programme the agro-industrial branches would be selected in accordance with the contribution they can make to: (a) enhancement of food security; (b) growth of agricultural productivity; (c) enhancement of international competitiveness which should include development of entrepreneurship; and (d) inflow of foreign direct and portfolio investments. Surveys would be undertaken to identify constraints on existing and pipeline investments in the agro-related branches and to formulate a tailor-made capacity-building strategy. The main objective of the strategy would be to propose solutions for overcoming the constraints, developing an effective investment facilitation system and creating an enabling environment.

This programme would be developed and implemented in close collaboration with multilateral and bilateral donor agencies.

2. Increasing awareness at the regional level of investment opportunities in least developed countries: In order to inform small and medium enterprises in developing and developed countries about the investment opportunities in least developed countries, and to mobilize public opinion support for least developed countries programmes and projects, it is proposed to:

(a) Prepare an annual investment guide on investment opportunities in agro-related industries in least developed countries at the regional level (East Asia, South Asia, Pacific Islands, East Africa, Southern Africa, Central and West Africa). Each investment guide would concentrate on providing details on major projects in agro-industries and brief profiles of pipeline projects. It would also contain relevant legislative, regulatory, financial and institutional details;

(b) Publish the proceedings and selected papers of the Least Developed Countries Symposium in a reader-friendly form to stimulate the interest of policy makers at the international level.

3. Capacity-building in the field of quality, testing, standardization and metrology (QSTM) in least developed countries: A needs assessment for QSTM was implemented for 10 African and 5 Asian countries in 1997 as a direct response to the recommendations of the third LDC Symposium. The second phase should be launched as a high-impact programme aimed at:

(a) Establishing and strengthening QSTM legal and institutional frameworks at a national and subregional level and application of continuous quality improvement systems.

(b) Developing national and regional strategies for overcoming constraints on the upgrading of QSTM capabilities in countries and regions.

This programme is being formulated on the basis of the results of the needs assessments and would be implemented in close cooperation with regional organizations (e.g. ARSO, ITC, ISO) and donor agencies/countries.

4. Capacity-building in industrial information services: Assessment of the needs for establishing effective information networking among enterprises at national, regional and international levels was carried out in 1997 in 18 African and 5 Asian least developed countries as a direct response to the recommendations of the third Least Developed Countries Ministerial Symposium. The follow-up project is being designed as a high-impact programme aiming at:

(a) Establishing commercially sustainable and self-reliant national information systems and networks with linkages to the investment and technology promotion programme of UNIDO;

(b) Providing access to the international business community to information on local resources and business opportunities.

The programme would be executed in collaboration with other United Nations agencies (in particular UNDP) and national and regional research institutes in the field of information technology.

5. Strengthening industrial infrastructure: UNIDO prepared a desk study in 1997 on investment opportunities in infrastructure in selected least developed countries. A field study exercise is needed in order to prepare updated and global assessment of the needs and opportunities for investment in economic and physical infrastructure (in particular on transportation, telecommunications, power generation and water supply), which are vital for promoting foreign investment and industrial development. The main objective would be to identify where private investment can be a viable solution for infrastructure in least developed countries. The results of the study would be published and distributed to potential investors, and disseminated through special workshops in both least developed countries and donor countries. As a follow-up, UNIDO may set up a technical cooperation programme aimed at establishing the necessary legal, management and contractual framework for promoting private investment in public infrastructure in least developed countries, and to

assist host countries to implement pilot projects in this field.

6. Capacity-building for investment promotion in least developed countries: Under this programme it is intended to assist in establishing capacities in African and Asian least developed countries for the mobilization of investments in particular foreign direct investment to be able to meet the challenges of globalization. For that purpose it is proposed to review investment policies in African and Asian least developed countries to identify the constraints and prospects for either creation or strengthening investment promotion agencies (IPAs) in the concerned least developed countries. The programme would include assistance in preparation of guidelines for project implementation/ identification, preparation of investors' guides and training of the managers of IPA investment opportunity studies. A high-impact programme for 10 African least developed countries has been already proposed for consideration under the programme for the Alliance for Africa's Industrialization.
