## DRIVING INDUSTRIAL DEVELOPMENT: THE ROLE OF DEMAND AND PRODUCTION TRANSFORMATION

**Thursday 28 June 2018 at 10:00 a.m.**  
Palais des Nations, Room XXI, Geneva

Industrial development requires both the creation of production capabilities and the expansion of markets for industrial goods. The interaction between these forces can lead towards a process of structural transformation and economic development. During the event, two recent UNIDO reports on these topics will be presented and discussed: the Industrial Development Report 2018, "Demand for Manufacturing: Driving Inclusive and Sustainable Industrial Development" and the Report "Structural Change for Inclusive and Sustainable Industrial Development".
