Green Industry Conference

**Session on Green Industry Index**
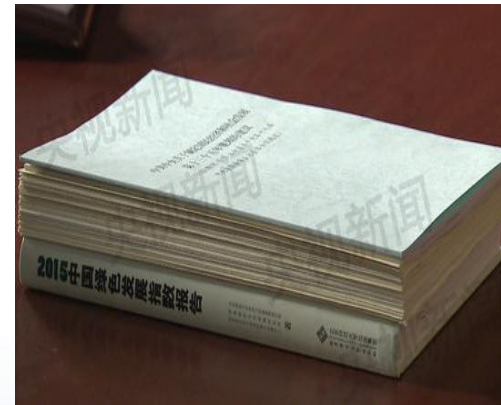

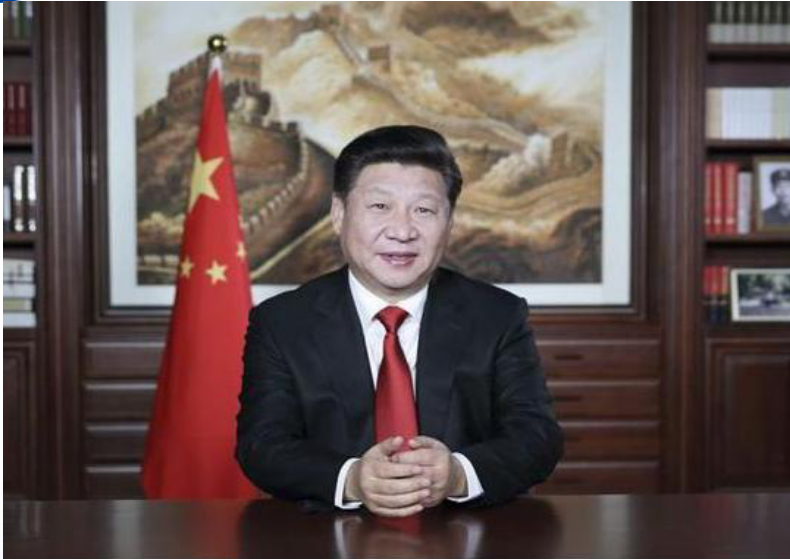

Green Indicators for Firms in China

Haoran PAN
School of Economics and Resource Management (ERM)
Beijing Normal University (BNU)

29th June 2016, Ulsan

ERM focuses on SD and green growth

ERM hosts UNIDO-UNEP GIP China Chapter Programme (GIP.CCP) since 2014

Greening the Industries

Efficient use and effective management of resources, energy, wastes, emission, renewables, processes, etc

Creating New Green Industries

3R industries, new environmental technologies, management, services, businesses, etc

Promote Green Industry Policies and Practices

Improvement, support, lead, green policy, etc

- Review international good practice in ranking green industries
- Develop criteria for membership standards
- Develop membership statutes based on global GIP practice
- Develop a blueprint for an index and ranking system
- Train for participants to conduct the enterprise ranking
- Test the ranking methodology in one selected province
- Review and finalize draft methodology for application at global level
- Implement green industry ranking with the support *inter alia* of UNIDO's center of excellence in China

An indicator system for green firms in China

Headline	Headline						
Key	Headline	Decoupling	Other key				
Core	Headline	Decoupling	Other key	Regional	Sectoral	Other core	
Basic	Headline	Decoupling	Other key	Regional	Sectoral	Other core	Others

The ranking of green firms

Green Rank 1	Green Rank 2
(0)	
(1)	(2)
	(3)
	(4)
	(5)

Thank you!
