GOAL - Global Options and Linkages	NGO	Austria	Vienna	GOAL is concerned with capacity building of social groups designed to enable them to evolve towards « dynamic stability with their environment» and « socio-ecological resilience ». Capacity building opens new spaces for creation, innovation and exploration. Given the insufficiencies of today's linear and deterministic development processes, we focus in particular on: •People and their motivation to learn and to change •Constantly changing complex systems •Complexity facilitation •Effective participation and ownership of knowledge, capabilities and skills. GOAL carries out action research supporting its lectures on "Facilitating Change for Sustainable Development" at the Centre for Development Research at BOKU University, Vienna.	<a href="http://www.goalnetwork.net">www.goalnetwork.net</a> (under reconstruction)	N/A	In order to improve capacity building interventions around the globe a dialogue needs to take place between researchers (universities, research institutions), policy-makers (government, funding, national and development agencies) and practitioners (national and international experts, advisers, consultants). GOAL advocates for an open exchange of knowledge between key actors in international cooperation.	1. The Change Lab - a system created by CDR/BOKU and GOAL, in which researchers, policymakers and practitioners interact to learn together. It is concerned essentially (but not only) with development in the frame of complex systems and the psychology of learning and change. The Change Lab is a both a mind space and a physical place where experts facing a difficult issue or situation will push themselves to interact with other experts in order to engage in both positive and negative learning. The Change Labs are "laboratories" in which you test things and get things done - both internally in your mindset and externally in how you grapple with the nuts and bolts of specific development issues.  2. Supporting the Change Lab; a simulation board game to support training and learning by complexity facilitators.

GOJA-Consulting	Business Sector	Austria	Maria Anzbach	We are a Consultancy, specialised on Urban Sustainable Development. REC Caucasus	Other	Armenia	Yerevan	The mission of the REC Caucasus is determined as "to assist in solving of environmental problems in the Caucasus region through the promotion of co-operation at national and regional level among NGOs, governments, business, local communities, and all other environmental stakeholders, in order to develop a free exchange of information, in line with the principles of the Aarhus Convention; offer assistance to all environmental NGOs and other stakeholders; and increase public participation in the decision-making process, thereby assisting the states of the Caucasus in the further development of a democratic civil society".	<a href="http://www.rec-caucasus.org">www.rec-caucasus.org</a> REC Caucasus successfully implements its mission through various programmes and projects throughout the Caucasus region. One of the tasks of REC Caucasus serves as a "bridge" between the public and governments. REC Caucasus assists its stakeholders in capacity building through provision of information, advice, and expertise and to encourage dialogue, cooperation and public participation in environmental decision-making. REC Caucasus plays an active role in inter-agency cooperation, too. The organisation together with active environmental NGOs and the ministries of environment promotes the idea of environmental protection and sustainable development in the South Caucasus countries, demonstrating examples and arguments of direct links of environmental degradation and destruction with the growth of poverty, migration, economic recession, etc., i.e. other components (social and economic) of sustainable development.	<a href="http://rec-caucasus.org/projects.php?lang=en">http://rec-caucasus.org/projects.php?lang=en</a> Smart city project <a href="http://rec-caucasus.am/launching-the-smart-city-profile-of-goris/">http://rec-caucasus.am/launching-the-smart-city-profile-of-goris/</a>	We are currently working on several directions related to green economy and smart cities, we have been successful in adapting resource efficiency and clean production mechanisms and practices for SMEs, as well as providing opportunity to city inhabitants, local stakeholders, governments, civil society to work out sustainable solutions for Smart development, as well as elaborated indicators for smart city of Goris based on UNECE Land and Housing Committee, and ITU methodologies. We will be interested in finding partnership opportunities to employ smart city solutions based on best available practices.
