**GOAL - Global Options and Linkages NGO**

**Country:** Austria Vienna

GOAL is concerned with capacity building of social groups designed to enable them to evolve towards « dynamic stability with their environment » and « socio-ecological resilience ». Capacity building opens new spaces for creation, innovation and exploration. Given the insufficiencies of today’s linear and deterministic development processes, we focus in particular on:

- People and their motivation to learn and to change
- Constantly changing complex systems
- Complexity facilitation
- Effective participation and ownership of knowledge, capabilities and skills.

GOAL carries out action research supporting its lectures on "Facilitating Change for Sustainable Development" at the Centre for Development Research at BOKU University, Vienna.

[www.goalnetwork.net](http://www.goalnetwork.net) [under reconstruction]

1. The Change Lab - a system created by CDR/BOKU and GOAL, in which researchers, policymakers and practitioners interact to learn together. It is concerned essentially (but not only) with development in the frame of complex systems and the psychology of learning and change.

The Change Lab is a both a mind space and a physical place where experts facing a difficult issue or situation will push themselves to interact with other experts in order to engage in both positive and negative learning. The Change Labs are "laboratories" in which you test things and get things done - both internally in your mindset and externally in how you grapple with the nuts and bolts of specific development issues.

2. Supporting the Change Lab: a simulation board game to support training and learning by complexity facilitators.
**GOJA-Consulting**  
**Business Sector** Austria  
**Maria Anzbach**  
We are a Consultancy, specialised on Urban Sustainable Development. GOJA developed a model of Sustainable Principles (Naturalness, Flexibility, Diversity, Proximity, Cooperation, Optimisation) which serve as a reference for urban development. The concept has been implement recently in EcoCity Zenata (Morocco). We executed several projects for UNIDO as EcoCity Expert.

- Safety & energy audits
- As certified auditor according to section 19 of energy efficiency law we organize audits and show ways how to improve the effectiveness and safety of cooling systems and technical building services.

**Investors in buildings for residential and commercial use.**

**Design and Engineering of HVAC systems for new projects as well as retrofit projects.**

**Experts in air condition and refrigeration systems.**

**Participants are invited to join the global United Smart Cities program. United Smart Cities is a global program, initiated by the United Nations Economic Commission for Europe (UNECE) and the Organization for International Economic Relations (OiER). It is a multi-stakeholder platform and presents a new and innovative way of bringing together the public and private sector, as well as academia and international organizations to develop and implement sustainable urban project.**
The mission of the REC Caucasus is determined as “To assist in solving of environmental problems in the Caucasus region through the promotion of co-operation at national and regional level among NGOs, governments, business, local communities, and all other environmental stakeholders, in order to develop a free exchange of information, in line with the principles of the Aarhus Convention; offer assistance to all environmental NGOs and other stakeholders; and increase public participation in the decision-making process, thereby assisting the states of the Caucasus in the further development of a democratic civil society”.

We are currently working on several directions related to green economy and smart cities, we have been successful in adapting resource efficiency and clean production mechanisms and practices for SMEs, as well as providing opportunity to city inhabitants, local stakeholders, governments, civil society to work out sustainable solutions for Smart development, as well as elaborated indicators for smart city of Goris based on UNECE Land and Housing Committee, and ITU methodologies. We will be interested in finding partnership opportunities to employ smart city solutions based on best available practices.
The mission of the REC Caucasus is determined as "to assist in solving of environmental problems in the Caucasus region through the promotion of co-operation at national and regional level among NGOs, governments, business, local communities, and all other environmental stakeholders, in order to develop a free exchange of information, in line with the principles of the Aarhus Convention, offer assistance to all environmental NGOs and other stakeholders; and increase public participation in the decision-making process, thereby assisting the states of the Caucasus in the further development of a democratic civil society". "www.rec-caucasus.am"

Projects:

REC Caucasus successfully implements its mission through three programme lines and various projects throughout the Caucasus region. RECC’s three focal programme areas are:

- Environmental Policy and Integration;
- Information and Capacity Building;
- Sustainable Management of Natural Resources

www.rec-caucasus.org

Sustainable cities, sustainable urban development, green cities, smart cities, resilient habitats, local environmental plans

Joint capacity-building initiatives targeting green, smart environmentally friendly technology transfer and public services,
- Exchange of experience and expertise on sustainable cities and landscapes,
- Diplomacy educational workshops, thematic travels, research, development and production of the SDG-oriented educational materials,

The Siraf Pars Institute (NGO) has volunteering activities in its social, environmental, urban culture areas, historical heritage conservation activities.

Siraf Pars

NGO

Iran

Siraf

Familiarity with traffic problems, air pollution education, teaching people about health, education for illiterate women and girls, Education Safety Education for Children Youth Employment and Entrepreneurship with Academic Documents

We concern about health, education, tourism, air pollution, the population, climate changes, employment and business matter, decomposable energy. Carving in industrial areas in south of Iran to create more beautiful landscapes. Care and maintenance of rare trees.

Smart Danube Region

NGO

Austria

Vienna

Smart Danube Region is launched in cooperation with the Senate of the Economy and other institutions such as the Austrian Institute of Technology, to initiate, support, plan, connect and implement innovative urban, regional and environmental projects in 19 countries of the Danube Region.

Master project website being developed and expanded in the next weeks

Not easy to explain as it is a connection of multisectoral projects in multiple locations, in Circular Economy, Electro-mobility, Visionary co-financers, state or partly state-owned agencies, expert consultancies, R&D.

 Participation in planning and implementing joint projects in the above fields.

As EPCF contractor SMCEC/SFECO are mainly focus on exploring overseas marketing projects especially in energy & chemical complex, medical and health care industry, infrastructure area such as transportation projects in metro, high-way and high-speed railway, and AI high tech products which adopted to cater the demands of city's sustainable developing, even to the associated financing facilities. We provide one-station package solutions to the government and the clients which belongs to the local government the proposals and service providers, NGOs.

If possible we are expected to meet the high-level of two bilateral government's officials whose mainly charge in the Ministry of Treasure, NIOC, the Ministry of Medical and Healthcare, even to the delegations from Shanghai municipal, the officials who can provide us how to access the Ministry of Treasure to solve the payment channel between China and Iran, due to we have project opportunities, but we are blocked by payment more smoothly and efficiently, even we have the proposals for barter way bilaterally.

If we concern about health, education, tourism, air pollution, the population, climate changes, employment and business matter, decomposable energy. Carving in industrial areas in south of Iran to create more beautiful landscapes. Care and maintenance of rare trees.
