

Fostering a new generation of parks and industrial zones for inclusive and sustainable development

Talking points

Rafik FEKI

- Phases of IP/SEZ development:
 - Diagnostics
 - Policy design and planning
 - Implementing and financing
 - Promotion and marketing
 - Monitoring and evaluation

- Classification of the industrial parks and connection with UNIDO services:
 - Industrial parks
 - Eco parks
 - Techno/Agro poles
 - Science technology and innovation parks
 - Special economic zones
 - Industrial corridors

- Strategic framework to define UNIDO services:
 - Assist governments/stakeholders to plan properly development of new parks or refurbishing if existing parks
 - Better understand concepts of parks , zones and other territorial units', their specializations, roles and expectations as development instruments, highlighting their evolution over time
 - Identify role of various stakeholders
 - Share best cases in establishing and managing of IPs
 - Describes main phases of planning and implementing a park or zone project

- Strategic importance of IZs within PCPs:
 - Integration with other support services
 - Social economic impact
 - Implication in terms of development policies and investments
 - Driver for industrial transformation
 - Synergy/interaction with Government/stakeholders

- Success stories/lessons learned from ongoing PCPs:
 - Examples of Senegal, Morocco, Cambodia
 - Specificity (no one-size fits all)
 - Increasing demand
