

## UNIDO-GCF COOPERATION

### Readiness and Preparatory Support Programme

#### CONTEXT

The Readiness and Preparatory Support Programme (RPSP) supports developing countries in strengthening their institutional capacities, governance mechanisms, and planning and programming frameworks towards a stronger partnership with the GCF and a transformational, long-term climate action agenda.

All developing country Parties to the UNFCCC can access the RPSP, with at least 50% of the resources going to particularly vulnerable countries, including Least Developed Countries (LDCs), Small Island Developing States (SIDS) and African States.

#### UNIDO CONTRIBUTION AND STRATEGY

By virtue of its unique mandate and by leveraging a global network of partners on inclusive and sustainable industrial development, UNIDO engages with Countries globally to remove obstacles towards their climate action plans.

These include, among others:

**Technology assessment:** analyzing the maturity and markets of technologies supporting net-zero, climate resilient development.

**Energy efficiency:** creating policies and building capacity to implement energy efficiency standards across industry leaders.

**Country programming:** identifying priority areas, fostering sustainable decision making and enabling a climate-receptive environment.

**Green Hydrogen:** enhancing the capacity to develop value chains, knowledge products and practical expertise on green hydrogen.

#### IMPACT

UNIDO has contributed to 17 Readiness grants in 15 countries, with 6 additional grants in 12 further countries in the pipeline.
