

UNIDO-GEF COOPERATION

UNIDO's Multi-stakeholder Partnerships for Integrated Solutions

CONTEXT

UNIDO is committed to achieving inclusive and sustainable industrial development (ISID) by collaborating with a diverse set of stakeholders, including the business sector and financial institutions.

UNIDO CONTRIBUTION AND STRATEGY

UNIDO recognizes the vital role of partnerships in achieving its ambitious goals. It fosters cooperation with governments, financial institutions, private sector entities, and civil society organizations through innovative collaboration models like the Programme for Country Partnership (PCP), multi-stakeholder platforms, and project-based initiatives. These partnerships offer numerous benefits, including technology transfer, expertise sharing, capacity-building, enhanced accountability through performance measurement, and leveraging of additional financing.

By working together with the business sector, UNIDO creates investment opportunities that drive technology innovation, economic growth and job

creation, transforming local labor markets. As digitalization and technological advancements reshape industries, UNIDO embraces the blurring of boundaries between the public, private, and social sectors, opening doors for pioneering "for-benefit" organizations that blend social and environmental goals with business objectives.

UNIDO also collaborates with financial institutions and partners to leverage seed investments in support of small and medium-sized enterprises as a means to stimulate innovation, as well as to trigger financial support for large-scale industrial projects. Through these efforts, UNIDO strives to create a sustainable and inclusive future for all.

IMPACT

Together, UNIDO and its partners aim to harness each other's strengths and foster innovative cooperation models in an effort to achieve inclusive and sustainable industrial development and offer practical solutions to the pressing global environmental challenges. Together, we can shape a better world for generations to come.

PROGRAMME FOR COUNTRY PARTNERSHIP (PCP)

NATIONAL OWNERSHIP

The PCP features strong government ownership and leadership in promoting inter-ministerial coordination and active partner mobilization.

PRIORITY INDUSTRIAL SECTORS AND AREAS

The PCP targets priority sectors essential for national industrial development, identified through a country diagnostic conducted by UNIDO.

MULTI-STAKEHOLDER PARTNERSHIP

The PCP is a multi-stakeholder partnership model, linking national governments, UN entities, development partners, financial institutions, businesses, academia, and civil society from program design to implementation.

FACILITATION OF PUBLIC AND PRIVATE INVESTMENT

The PCP coordinates three financial resource streams (development assistance, public finance, and business sector investment) under host government leadership to fund priority industrial sectors and projects.

THE PCP MODEL WAS FIRST INTRODUCED IN 2014. THE CURRENT PORTFOLIO CONSISTS OF ELEVEN COUNTRIES ACROSS DIFFERENT REGIONS OF THE GLOBE. EACH PCP IS AT A DIFFERENT STAGE OF DEVELOPMENT.

PROGRESS BY INNOVATION IS KEY IN HELPING COUNTRIES ADDRESS THE MAIN GLOBAL ENVIRONMENTAL AND ECONOMIC CHALLENGES OF CLIMATE CHANGE, BIODIVERSITY LOSS, AND POVERTY ERADICATION.
